## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - (I) Claims 1-14, drawn to a lighting device incorporating a plurality of LEDs in a particular arrangement, classified in Class 362, Subclass 252.
  - (II) Claims 15-22, drawn to a lighting device incorporating a Fresnel lens, classified in Class 362, Subclass 235.
  - (III) Claims 23-29, drawn to a lighting device incorporating a controller that conditions electric power for LEDs, classified in Class 362, Subclass 251.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (II or III) and (I) are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Invention (I) recites a plurality of LEDs disposed in a radial array about a vertical axis, which is not found in Inventions (II or III). The subcombination has separate utility such as a specific arrangement for a plurality of LEDs.

Art Unit: 2875

3. Inventions (II) and (III) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions do not require the other/additional lighting device, wherein a Fresnel lens and a controller for conditioning electric power provide separate utility and are not necessary components of one another within a light assembly.

### ***Conclusion***

The separate inventions, as described above, would require multiple and distinct searches, thus, placing an unnecessary burden on the examiner. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Han whose telephone number is (571) 272-2207. The examiner can normally be reached on 8:00am-5:00pm.
